## Specialty Nail Gun & Nose Pieces

### KZ-312 Specialty Nail Gun

- Quick-Change Nose Pieces
- Shoots Nail Sizes From 7/16" to 1-1/8"
- Shoots round, oval and square head nails

The pneumatic power nailer KZ is a compact special purpose nailing gun for the most widely used large head decorative upholstery nails. Safe, durable, practical, portable, straight forward easy to handle, flexible, fast - this Power Tool will reduce production cost.

The Nose piece design of the KZ gun easily allows for setting all decorative nail sizes, from a diameter of 7/16" up to a diameter of 1-1/8" including round head, square head, oval head and conical head nails.

Through a quick connect coupler, the gun is directly connected to your air supply. The controlled pneumatic operation of the Setting Tool assures a consistent nail set. The 'front loader' concept is as simple as it is effective. Just drop a nail into the mouthpiece. A magnet in the center will hold the nail in place and allows for horizontal and vertical operation.

The gun is exceptionally robust and reliable in operation and is supported by our comprehensive maintenance service to assure that the tool remains working at peak efficiency.
